#### **Serpukhov-15**

Western Command Post (GSB) control space group EWS (aka object 455) in / h 22251. The prototype model is the set of resources to bring and display warning "Crocus". Office SC EWS systems "Eye", "Eye-On" and " Eye-1 ". Address: Kaluga region, Zhukovsky district, village Kurilovo (object " Serpukhov-15 ") (approximately 35 km north-west of Serpukhov). A little history: - In the spring of 1971 started the construction of the object 455 complex US-K "Eye" in the Serpukhov area. Formation of the military wing of the future object. - In the spring of 1972 at the control station and reception of information systems to a US-Serpukhov began assembly equipment. - End of 1974 at the site of US-455 K in Serpukhov completed installation and configuration of equipment. Started working out of combat programs. - 04/14/1975 city issued a decree of the CPSU Central Committee and USSR Council of entry in 1976 in exploitation of the missile attack warning systems (EWS) and its structure - the space of VC-K "Eye" with eight SC 5V95 at HEO. Papers - December 1976 - the first phase of the PRN system is placed on combat duty. - 1978 - commenced construction work on the west KP US-KMO system in Serpukhov. - 16/1/1979 by the decree of the Central Committee and the Council of Ministers System CSS -K "The Eye" adopted in the joint operation. The same decree CSRI "Comet" and NPO. Lavochkin mandated to develop US-KMO system "Eye-1". - 05/29/1980 city adopted a resolution of the CC and the Council of Ministers on the enhancement and development of US-K supplement its single satellite in geostationary orbit and to establish a system of US-KS "Eye-On". - 1980 - US-system to involve the SCN system. - 30/12/1982 city - the system of US-to put on combat duty. - 1984 - the system of US-K began surveillance of U.S. in the staffing of the orbital constellation of spacecraft. - 03/14/1985 PM chief directive Air Defense System CSS-K transformed

into an US-KS, and continued performance of combat duty. - 1985 - began setting apparatus West KP US-KMO system in Serpukhov . - January 1991 - started testing US-KMO system. - 14/02/1991 city held the first launch of a geostationary satellite, Kosmos-2133 "next-generation US-KMO system. - 1995 - completed state testing system, the US-KMO . - 25.12.96 PM put into operation (entered service on Presidential Decree № 1770) first stage of a global space of a second generation US-KMO (a system of "Eye-1") with the GSB at Serpukhov and 71H6 spacecraft in geostationary orbit (early detect launches of SLBMs from the continents, seas and oceans). - At night 9-10.05.2001 PM - fire. According to the commander of Russia VKS A. Perminov, the cause of the fire that destroyed the command post (CP) is likely to become a short circuit in one of the power cables. The likelihood of sabotage in the CP, according to Perminov, is excluded. The exact cause of the accident establishes a Commission of Inquiry. The building manual is almost completely burned. Employees are able to make all mobile equipment and documents, but the stationary vehicle destroyed. Burnt as a communication system, located in the walls, between floors and under the building. In a very preliminary assessment, the damage amounted to at least 2 billion rubles.

7 months ago risk77

4

Such part numbers long ago not. So no need of the ancient sources give the information. "The Eye" - it sets itself in orbit. The town itself Serpukhov-15 (Kurilovo) - Moscow region, and the area around it - Kaluga. Everything is functioning successfully.

#### Military town Nerastannoe

### Checkpoint on road at East end:

East Gearbox

30 years ago, the checkpoint called "Kuskovskii gate", because there were non-commissioned officers.

This place is a building Category: checkpoint, military

place comments:

16 months ago Buran +3

Redress, please, what is wrong.

16 months ago 123ALEX123 +6

Может что то и изменилось(я не был здесь с 80го года),но УТК и военная зона были одной территорией,военная зона имела размеры больше,и состояла примерно из 2х равных частей разделённых с севера на юг.Стрельбище,показанное с северной стороны зоны находилось на территории зоны.Вместо 3х КПП показанных с восточной стороны зоны было одно,которое разделяло зону и жил.поселок(сейчас обозначен как Талалихино).И вообще интересно посмотреть как там всё стало.

Maybe something has changed, and (I was not here with 80go year), but the VTR and the military zone were one territory, the military zone had a size larger, and consisted of approximately 2 equal parts, separated from North to South. Range shown on the north side area located on the territory zone.Вместо 3 checkpoints shown on the east side of the zone was one that divided the zone and zhil.poselok (now designated as Talalikhin). And always interesting to see how it all was.

<b>Alexander Tugolukov</b>	Posted: Mon November 6, 2009 11:27 pm Post subject:	
Joined: 08.05.2009 Posts: 3 Location: <b>Chekhov-2</b>	Hello, graduates BY <b>NBC</b> (Tambov)! My name is Alexander Tugolukov. Released from the walls of the native School 18 June 2002 (3 Company). Very often remember their school years here. I guess I always knew that I would miss this year the best school of life. It was very interesting to learn and gain experience. In 10th grade I knew that I would learn here and become a professional chemist. Only here, I realized what discipline, responsibility, troop partnership. Very pleased office, especially the performance of service on guard duty (head guard). He liked to teach guards (guards) and train yourself. From the first days of service agreed to command the office and probably one of the few who have never been reduced to "ordinary" students. With much gratitude I recall the teaching staff College. All were different and the requirements were peculiar. But the goal was one - to teach our military training in a real way. To be honest, it was hard to learn only the first course. Then your successes and your name starts to work for you 50 percent (subject to positive progress). The only negative memories - of Colonel Akhmedov, who cut off at one of the sessions, students from my office, who went to the gold medal (with me). After that he ceased to strive for excellent grades and graduated with honors easy. Friends chemists, do not get lost! Write to Communicate! We appreciate wherever we are needed. Here are just Motherland needs, we are becoming less and less. Good luck to you all and good luck!	

Strategic Rocket Forces, 2006 DMR winter, Kaluga region. Balabanovo.

РВСН, ДМБ 2006 зима, Калужская обл Балабаново.

For example, such an object as the NBI Strategic Rocket Forces (the central command post missile forces), it's scary secret underground object made of steel and concrete. Let there be only a man with a tolerance of secrecy. Where can I find trustworthy Civil Engineers?" And the very concept. I know a retired colonel who built this is the PSC, I am his grandson served. So he told me how they were built. We lived in mud huts because their air is not visible. On the roads leading to the concept of growing trees in boxes on wheels. At night, breaks them for transport and in the afternoon roll his back on the road. etc. and civil engineering that? Look at me under the window construction, many forum users have seen. Builders of the evening there is a pool of his own urine in a ditch pohryukivayut pleasure, can no longer speak.. "

Например такой объект как ЦКП РВСН (Центральный командный пункт ракетных войск), жутко секретный подземный объект из стали и бетона.

All that we can talk about the bunker - that he is somewhere in the region near Moscow Odintsov at a depth of several tens of meters. This is the central command post of the Strategic Rocket Forces. Eyes, ears and brain of the Russian nuclear shield.

Almost 20 kilometers of tunnels, rooms, communications. Protected even from a direct hit. Capable in the event of a threat of six months to become a fully autonomous object, and to obey the order of Supreme Commander.

For another checkpoint is a two-storey building. Unremarkable letters on one of the entries reads: "NBI SMF. Behind the door a soldier checks the identification badge. Behind him staircase leads down into a three-story underground bunker. There is already half a century without a break are stationed rocketeers. We are always willing to give the command to launch a nuclear strike.

At this site there is an underground city built for family members of the CPSU Central Committee and other Soviet leaders. The depth of more than 200 meters. A branch of the Moscow subway. Along the southern boundary of the object is located a shooting range. We were brought there every month from Venyukovo (Chekhov-3). We have there was a communication center of Staff - too underground but much less profound.

Choate is NOT a clear reference some sort

 3 months ago, former lieutenant of  6  

No there is no underground subway branch in Moscow. I have something over there to leave at the time to spell.

 3 months ago:  7  

Expound further.

INFA on procurement tenders are public (late in the year). Show that buy military units, and supersekretnye, it is very interesting. And if proanalizirovat much disk imaging, you can even trace the structure and hierarchy of the Ministry of Defense with the numbers in the hour (and often with addresses). Apparently this is not a secret if it is open and official website (see <http://document.kremlin.ru/doc.asp?ID=32374&PSC=1&PT=1&Page=2>). But although all the fear of publicity, perhaps from old habit memory, for it was in Soviet times. I think that even now, when thus collected инфу post, take a seat, and proves that it has collected from the "open and public":))) for the hundredth time, one realizes that our state beautiful.

work in the electrical laboratory.

Numerous references: 33877 = Chekhov 3

ГУК GUK – object in 33877 area Chekhov 3 Refs to Nos 1, 3 & 4

Also refs to control systems for air in B-60, B61, B65

Object TSSGB-2 in the Kuznetsk-8 (4 barrel) - this reserve Chekhov-2. Object "forestry" (the old name, new do not know) - STMC reserve in Chekhov-3 (Vaulovo).

But in between traffic - curious.

Yes, the question of why TSSGB-2 in the Kuznetsk-8 is actively used by communicators?

Объект ЦСГБ-2 в Кузнецке-8 (4 ствола) - это резерв Чехова-2.

Объект "Лесхоз" (старое название, нового не знаю) - резерв ГУК в Чехове-3 (Ваулово).

А вот что между ними транспортного – любопытно

Да, вопрос, почему ЦСГБ-2 в Кузнецке-8 очень активно используется связистами ?
