Description

Why did Britain decide in 1947 to build an atomic bomb? What plans were t
Employing the previously inaccessible confidential records of the British gov
decade after World War II, including those of the Chiefs of Staff, this book
detailed assessment of the technical, political, and economic factors behind
policy. The authors argue that British thinking on nuclear deterrence was di
made a unique contribution to early theorizing on nuclear weapons, and co
strategic thought of Britain and the United States.

Reviews

"Specialists in British nuclear policy, defense policy making and post-war
relations will find this book rewarding....[This book] will reward the reader
and thought provoking insights into the first two nuclear decades."--*Britis
Newsletter*

"A fascinating book."--*The International History Review*

"The research is prodigious....The result is an important addition to cold wa
-*American Historical Review*
