      j.   The SHD "F" will only be used on U.S. originated classified messages addressed to activities of the United Kingdom that contain the designation US-UK EYES ONLY". In addition, the on-line special routing indicator RBOYST will be used on messages of the type indicated above addressed to a UK activity. Multiple address messages of the type indicated addressed to a UK activity and another nation may be sent on-line to the UK, but must be handled in accordance with the General Instructions in ACP 117 CAN-US SUPP-1 () for the remaining nation.

      k.   The designator "L" will only be used on US originated classified traffic addressed to NATO activities and NATO member nations that contain the SHD ATOMAL. Those NATO activities capable of receiving ATOMAL traffic on-line are shown in ACP 117 CAN-US SUPP-1 (). Multiple address messages of the type indicated, addressed to another NATO command or member nation that does not have this capability, must be handled in accordance with the General Instructions in ACP 117 CAN-US SUPP-1 () for the remaining NATO activity or nation.

      l.   The designator "H" will only be used on US-originated classified traffic addressed to NATO activities and NATO member nations that contain the Special Handling Designation EXCLUSIVE. Those NATO activities capable of receiving EXLCUSIVE traffic on-line are shown in ACP 117 CAN US SUPP-1 (). Messages marked EXCLUSIVE are to be delivered only to person(s) whose name(s) or designation(s) appear(s) immediately following the "EXCLUSIVE", or in the absence of the person(s) so addressed, to the person(s) authorized representative. Only specially designated personnel, in accordance with the procedures defined by the appropriate operating agency/agencies, must handle these messages.

NOTE: In this instance the message would appear as a US
CONFIDENTIAL message. However, AUTODIN software compensates for
this and proper TRC checks are made.

     g. Special Category (SPECAT) or Special Handling Designator
(SHD) messages will indicate the true security in format line 4.
In addition, the appropriate SPECAT or SHD repeated five times
preceded by an oblique (/) would immediately follow the security
characters appearing in format line 4.

     h. The SPECAT designator "A" will be used on those SPECAT
messages designated as SIOP-ESI. All other SPECAT messages will
use the designator "B".

     i. The designators "A" and "B" will only be used in
conjunction with the SPECAT designated routing indicators listed
in ACP 117 CAN-US SUPP-1 (), ACP 117 US SUPP-2 (), and/or ACP 117
US SUPP-4().

          (1) Example of a SPECAT SIOP-ESI message at a TOP
SECRET security level.
