

Part 4 Disarmament

~~Part~~

Michael Pollitt's experiments with 'professor' art's people to give subject an ~~idea~~ election  
start of incoming power

→ Most people followed instructions -  
relatable moral games because someone  
in authority has art's. The C do's  
→ shouldn't say anything what has the  
effect → need to challenge moral's  
don't not support ~~and~~ acceptability  
of work with them

Steps -

Reverse collaboration with US  
(accept on ~~steps~~ verification / non-particip)

Steps down the nuclear ladder

→ AWE - necessary obstacles,  
Problem → threatening adjustment can be  
implied as acknowledgment: now  
→ clearly state changes as steps to goal  
of disarmament -

(low levels)

What Steps could AWE take?

- Fewer warheads
- No new warheads
- No 'improved' warheads
- Low alert / de-alerted posture
- No new facilities
- dis-assembled warheads
- Small production + RND capabilities
- demand production + research capabilities
- knowledge related with no facilities
- active elimination of knowledge  
    ~~of~~ (of Enigmas)
- abandon title production
- enhance verification / NPT role

Safety / Issues / the

(a) 1x10<sup>11</sup> (b) 7 (c) > 6

- satellite risk → Starlink's increase  
greatest risk is able to capture beam  
+ time loss

100% for 1  
1 per factor's ———→

← ↑ →  
discrepancy.

→ If you use old parts for 10yrs then parts has  
50% its projected 30m seen → is this a  
deal? → never risk
