to Beyond Tri

Frank Cor + Co, book (ISBN-714 66297)

Ch 5 - Kelly's last interview 13/2/04  
David Kelly - a BW

'There is no diff between offensive + defence  
research - the only difference is intent.'

Can UK use SRS independent of US?

Qs - (1) Can Northwood create targeted data for SRS?

(2) Does targeted data feed for SRS (+ old system) come directly from STRATCOM or ~~intelligence~~ via Northwood?

→ Will SRS change the way EAMs are handled on SSBN?

SACEUR

CINCEURCOM

STRATCOM

MIDB

Northwood

UK

(1) UK Independent plan for Strategic use of

NW against Russia

(2) Capabilities for adaptive planning

- allocated by ~~STRATCOM~~ SACEUR ~~approved by Northwood~~

(3) Role within US SIOP in respect to SACEUR input to SIOP

(4) Role with EURCOM/STRATCOM plan ~~in respect to request for SACEUR~~

(5) poss UK independent adaptive planning

(6) Capability for adaptive planning

- ~~allocated~~ <sup>cap</sup> by STRATCOM/EURCOM, approved by Polcom

# AWO 02 Annual Report

25yr contract 2000-2025

- 'now covers the expected life of the tritium system'

Long term committed to pulsed neutron facility - VIPER

New computer - commissioning 02

→ and improve in computer power planned  
proposed hydrodynamic research facility (HRF)  
(for Awo radiography)

02 - AWE / CEA / CEA collaboration over a number  
→ to validate computer model

New tritium facility - system as exists on  
on the CTR03/4. It will provide the means to deal with research &  
support the tritium workload steadily + will also  
mean a 100-fold reduction in the operational  
discharges of tritium at AWO.

'We have performed well during the first year of the  
current ten-year contract + particularly during  
the year under review. We have met all our  
milestones

### 3 potential uses of BWL

- ① Independently against Russia
- ② As part of NATO
- ③ In US approved operation elsewhere  
→ As a proxy

Br ~~R~~ use of NW outright NATO + where there is no threat to Br, would only be possible where there was US approval → a US proxy.

For CND detem

- ① Is there a low risk of NW use  
→ redundant + irrelevant
- ② Is there a threat of NW use  
→ dangerous
