(1) time, location, yield and test ids from DOE/NV-209-REV 15, December 2000. m_b (P), body-wave magnitude from PDE/ISC. From March 01, 1962 through November 26, 1991, a total of 24 unclear tests are conducted at the Nevada Test Site for United Kingdom (UK). These are reported on DOE/NV-209-REV 15. (2) SS=STsR-SS system and TSG=STsR-TSG system.
