SEPTEMBER 1,1995
Naval Surface Warfare Center, Dahlgren Division,
70 -- 70 - SOFTWARE LICENSES AND SUPPORT
SOL N00178-95-Q-0100
The Government intends to purchase on a sole source basis the Graphical User Interface (GUI) Management System Developers software licenses and support. The following software and support items are manufactured by Visual Edge Software Limited; UIM\X version 2.9 GUI Development Software license for Sun/Solaris 2.3 (12 each); UIM/X GUI Development Software licenses for SGI/XRIX 5.2 version 2.9 (2 each); UIM/X Annual Software support inclusive of all updates, upgrades, enhancements and unlimited fax, email and telephone support Monday thru Friday exclusive of Government holidays and during the hours of 0800 to 1700 (12 each for 1 year); the Government intends to purchase on a sole source basis the following software and support items as manufactured by Bluestone: Deluxe extension for Sun network licenses and support inclusive of all updates, upgrades, enhancements and unlimited fax, email and telephone support Monday thru Friday exclusive of Government holidays and during the hours of 0800 to 1700 (1 each for 1 year); Deluxe extension for SGI licenses and support inclusive of all updates, upgrades, enhancements and unlimited fac, email and telephone support Monday thru Friday exclusive of Government holidays and during the hours of 0800 to 1700 (2 each for 1 year). The Government requires a product which is designed to develop graphical user interfaces for computer systems. These items are necessary to provide the required computational resources and user interface for evolving mission critical functions in support of strategic retargeting system (SRS) initiatives. The GUI applications must adhere to human factor design requirements and techniques as specified in OD 18413, human factors design standards for fleet ballistic missile systems, and OD 61771, fire control graphics requirements. The GUI software identified above is currently being utilized by the prime fire control system contractor. It is essential that the products developed by NSWCDD and the prime contractor for deployment on the fire control system utilize the same GUI tool. Award is to be made under Simplified Acquisition Procedures.

70--SOFTWARE AND SUPPORT
SOL N00178-97-Q-0013
DESC: The Government intends to purchase on a sole source basis the following software and software support items manufactured and provided by Wind River Systems Inc. The Government requires software and support to be completely consistent and compatible with the existing Government environment. The items are: (1) Wind Foundation Classes (5 user license) (1 each); (2) Annual maintenance and support for Wind Foundation Classes (1 each); (3) VXWorks Wrapper Classes Source Code (1 each); (4) Source Update Service for VXWorks Wrapper Classes (1 each); (5) Windnet SNMP (1 each); (6) Annual maintenance and support for SNMP (1 each); (7) SNMP Source Code (1 each); (8) SNMP Target Licenses (750 out of 1000) (1 each); (10) Windview (8 user license (1 each); (11) Annual maintenance and support for Windview (8 seats) (1 each); (12) Stethoscope (2 user license) (1 each). (13) Annual maintenance and support for Stethoscope (2 seats) (1 each); (14) SNMP Target licenses (250 out of 1000) (1 each). The annual software support shall consist of all updates, upgrades and unlimited telephone support, Monday thru Friday excluding Government holidays, hours 8:00 am to 5:00 pm EST. Wind River Systems Inc is the proprietary and only known source to provide the software and support. The Government has approximately $500K worth of Wind River Systems Inc. already being utilized. The above items are to upgrade the existing software and must be completely compatible with the Government owned Wind River Systems Inc proprietary software. The above items are in direct support of the Submarine Launch Ballistic Missile (SLBM) program. The VXWorks Operating System is a commercially developed product which is designed to execute on the PowerPC Central Processing Unit (CPU). Strategic Systems Program (SSP) **Fire Control** and Guidance Branch (SP23) has incorporated the PowerPC CPU into the SLBM **Fire Control** Computer architecture as part of the MK 98 Mod 4 (United States) and Mod 5 (United Kingdom) **TRIDENT Fire Control** System. This upgrade is necessary to provide the required computational resources for evolving mission critical functions in support of Strategic Retargeting System (SRS) initiatives. Complete system capability and compatibility is absolutely necessary. Award is to be made utilizing Simplified Acquisition Procedures. All responsible sources shall provide manufacturer's specifications with their fax quote which shall be considered by the Naval Surface Warfare Center, Dahlgren Division, Dahlgren, VA 22448. Fax number is 540-653-2958 Attn: Barbara Walters, Code SD18. THE GOVERNMENT SHALL NOT ISSUE A WRITTEN QUOTE AS ALL ITEMS ARE CALLED OUT IN THIS CBD NOTICE. The items shall be shipped FOB Destination to the Naval Surface Warfare Center, Dahlgren Division, Dahlgren, VA 22448. Closing date is 23 June 1997. Anticipate award by 25 June 1997 with delivery by 23 July 1997.

AUGUST 4,1997
70 -- SOFTWARE AND SUPPORT
SOL N00178-97-Q-0184
E-MAIL: Naval Surface Warfare Center, Dahlgren Division,
The Government intends to purchase on a sole source basis the following software and software support items manufactured and provided by Green Hills Software Inc. The Government requires software and support to be completely consistent and compatible with the existing Government environment. The items are (1) p/n TORNSRV-PPC, Green Hills WRS TORNADO SERVER LICENSE ON SUN SOLARIS 2.5.1 or higher (6 each); (2) p/n TORNSRV-PPC, Green Hills WRS TORNADO SERVER on SUN one (1) year annual software maintenance (6 each); (3) p/n P/NGF-PPC, Green Hills optimizing fortran compiler and multi for PPC family, floating license on SUN SOLARIS 2.5.1 or higher (2 each); (4) p/n GF-PPC, Green Hills optimizing fortran compiler and multi for PPC family, floating license on SUN SOLARIS 2.5.1 or higher one (1) year annual software maintenance (2 each). The software and annual software support/maintenance shall be in accordance with Green Hills Binary Software License and Maintenance Agreement G20080. Green Hills Software Inc. is the proprietary and only known source to provide this software and support. This Green Hills Wind River Systems (WRS) Tornado, Fortran compiler, and multi software upgrade is an upgrade to our current in-house Wind River Systems operating system environment. Since the Government's software development environment, SLBM's Distributed Graphics Network (DGSNET) is running Sun Microsystems Solaris 2.x operating system platforms, the Government's tactical FCS environment is unable to support current and future simulation models, fleet media, and targeting data from SLBM's DGSNET. This tactical operating system software upgrade is essential so that the Government's tactical FCS environment will be able to support Solarix 2.x software simulation models, fleet media, and targeting data from the DGSNET software development environment. Therefore, the Government's tactical FCS is unable to support current and future mission reqirements. Green Hills Software Inc. is the only commercial vendor identified that supports Solaris 2.x operating system target software in the VxWorks tactical operating system on the Motorola PowerPC 603 chip. Complete system capability and compatibility is absolutely necessary. Award is to be made utilizing Simplified Acquisition Procedures

AUGUST 24,1999 70 -- SOFTWARE AND SUPPORT
SOL N00178-99-Q-0020
E-MAIL: Dahlgren Division, Naval Surface Warfare Center,
The Government intends to purchase on a sole source all or none basis the following software items manufactured by the Mathworks Inc.: (1) Simulink concurrent all-platforms include Windows Unix and Linux to include one year software support (3 each); (2) Real-Time Workshop concurrent, all-platforms include Windows, Unix and Linux and includes one year software support (1 each); (3) Stateflow concurrent all-platforms, include Windows, Unix and Linux and includes one year software support (2 each); (4) Stateflow Coder concurrent, all-platforms include Windows, Unix and Linux and includes one year software support. All items shall be Y2K compliant and written documentation addressing this issue must be provided with the vendor's quote. Software support shall consist of all updates, upgrades, media, documentation and unlimited telephone support. The submarine Launch Ballistic Missiles (SLBM) is upgrading its in-house software product MathWorks MathLab on Distributed Graphics Network (DGSNET). This upgradewill provide Design Automation features to the MathLab software product. These software products are required by NSWCDD K41 Fire Control Formulation Branch for developing fire control computational specifications for United States (US) and United Kingdom (UK) SLBM systems. This software is essential in supporting SLBM mission critical programs such as TRIDENT II, TRIDENT II BACKFIT, TRIDENT I, and UK TRIDENT II for current and future mission requirements. The MathWorks Inc. is the manufacturer and only source to provide this software and support. This software must be completely compatible with the Government's existing equipment. This requirement is to be processed using the Simplified Acquisition Procedures

70 -- COMPUTER HARDWARE VME BOARDS

SOL N00178-98-Q-0026

The Naval Surface Warfare Center, Dahlgren Division, intends to award a contract to VI Computer Incorporated on a sole source basis for the following computer hardware products. 1.POWER 4G-200-128 "GDDS" Official Production Version (QTY. 10 EACH), 2.VXPP4G Vxworks BSP "GDDS" Official Production Version" (QTY 1 EACH). This requirement is for PPC VME boards which are required to support pre-Strategic Systems Programs Alteration (SPALT) and post-SPALT MK 98 Mod 4/5 Fire Control System software development. This hardware is the representative of the MK98 Mode 4/5 FCS being deployed, and is essential in supporting the Submarine Launched Ballistic Missile (SLBM) mission critical actives in support of Strategic Retargeting System (SRS) and Life Cycle Cost Control (LC3) initiative. The Power 4G-200-129 PowerPC (PPC) Versa Module Eurocard (VME) boards and related board support package (BSP) is in support of the advanced development effort of the MK 98 Mod 4 (US) and MK 98 Mode 5 (UK) Trident II Fire Control System (FCS) software.. This type of VME board is a custom design manufactured solely by VI Computer Inc. For the Strategic Systems Programs (SSP, for the MK98 Mode 4/5 FCS program. The required product is a representative of the SLBM fleet hardware being deployed in FY02 and is currently being produced under a limited projection run. NSWCDD has program requirements to maintain software/hardware compatibility between VME development and production platforms.

70--COMPUTER HARDWARE VME BOARDS
SOL N00178-98-Q-0028
DESC: The Naval Surface Warfare Center, Dahlgren Division, intends to award a contract to VMETRO Incorporated on a sole source basis for the following computer hardware and software products.
1. SSTBAT-325C; State, Timing, Anomaly and Pattern Generator, Package with P2 Support (VBT325C, TIMBAT-PB, STIM200-PB/C VPC-MKII) (Quantity 1 package);
2.3V-325-PC: BUSVIEW FOR WINDOWS, A graphical user interface for the VBT-325 includes 401-PC-232 (supports windows 3.11 Windows 95 and NT) (Quantity 1 each);
3. VDRIVE-PB/B:
VMEBUS Driver Module w/system controller, master interface, slave with 256k mem, block mode support, interrupt REQ/ACK(Quantity 1 each);
4. VPC MKII: VMETRO piggyback carrier board for stand alone operation of TIM200-PB, STIM200-PB, TIMBAT-PB, VDRIVE-PB AND VBAT64-PB (Quantity 1 each);
5. PBTM-315C: Advanced 32/64 bit PMC BUS analyzer, 128 channel, 256k buffer, 16 level sequencer, event counting/bus utilization/bus transfer rate statistic (Quantity 1 each);
6. BV-315-PC: BUSVIEW FOR WINDOWS, A GRAPHICAL USER INTERFACE FOR THE PBT-315 (SUPPORT WINDOWS 3.11, 95 and NT) (Quantity 1 each) .
This requirement is for VMEBUS analyzer with supporting hardware and software to support and comply with a requirement to support a Standard Development Environment (SDE). It has been defined as a common tool for SDE in supporting SLBM mission critical programs such as **TRIDENT** II MOD 4 upgrades. The items listed above are essential for supporting SDE at NSWCDD and other auxiliary sites directed to support SDE. A full and open competition is not feasible because SLBM has program requirements to maintain software/hardware compatibility between **TRIDENT** II **Fire Control** Systems and supporting test equipment platforms at NSWCDD and other auxiliary sites directed to support SDE.

February 7, 2000
SUBJECT: 58--DATA/STE TERMINAL
SOL N00178-00-Q-1021
DESC: The Naval Surface Warfare Center, Dahlgren Division, intends to award a contract on a sole source basis to L-3 Communications Corporation for ten (10) each of a Data/STE, Data Terminal (ISDN/PSTN). This is a combined synopsis/solicitation announcement; quotes are being requested and a written solicitation will not be issued. The request for quote number is N00178-00-Q-1021. The Data/STE provides high-speed encryption of data transmissions in digital and analog networks in a single integrated package. The Data/STE is manufactured by L-3 Communications Systems-East. This equipment will be used to allow classified data to be transferred between NSWCDD and the remote/alternate sites, within the SRS Data Links community. The Data/STE manufactured by L-3 Communications is the only product authorized by the Federal Government. The unique features of the data/STE allows backward compatibility with the STU-III and PSTN connectivity. The Terminal is NSA certified for operational traffic at classification levels ranging from unclassified through TOP Secret Sensitive Compartmented Information (TS SCI). The terminal can operate at asynchronous speeds up to 38.4Kbps. The terminal can be upgraded via software download or via One expansion Type III PCMCIA slot. This provides the means to add new features as they become available. The combination of these unique features of the Data/STE terminal is a key factor to the NSWCDD as this equipment will be used in support of a hardware upgrade to the Submarine Launched Ballistic Missile (SLBM) Retargeting System Data Links (SRSDL) System. Award is to be made under Simplified Acquisition Procedures. All responsible sources shall provide their quote (fax quotes acceptable) to be considered to Contracting Officer, Attn: SD111/Bldg 183/Room 102, Naval Surface Warfare Center, Dahlgren Division,

N00030-01-C-0004

The Boeing Company, Anaheim, Calif., is being awarded a $52,578,011 combination fixed-price-incentive, cost-plus-incentive-fee and cost-plus-fixed-fee contract to provide the basic contract for navigation inertial equipment modification and repair, and for technical support for ship inertial navigation system, electrostatically supported gyro monitor, and electrostatically supported gyro navigator for the Trident (United States) and Trident (United Kingdom). Work will be performed in Anaheim, Calif., and is expected to be completed by September 2003. Contract funds in the amount of $31,551,708 will expire at the end of the current fiscal year. This contract was not competitively procured. The Navy's Strategic Systems Programs, Washington, D.C., is the contracting activity (N00030-01-C-0004).

K -- FY01 UK SWSMIN DEVELOPMENT AND PRODUCTION SOL N00030-99-G-0059 FY01 UK Development is a continuation of SWSMIN MK 1 MOD 0 and MK 1 MOD 2 efforts initiated in FY00. The MOD 0 efforts include installation and checkout of the MOD 0 proofing kit in the UK CR, delivery of the SPALT proofing document and UK FC fleet documentation to support SWSMIN MOD 0 and installation support to SWSMIN MOD 0. The MOD 2 efforts include the development of the MK 1 MOD 2 documentation package, selection and qualification of MOD 2 unique hardware, preparation of UK inputs to the SWSMIN MK 1 MOD 1/2 SPALT proposal, delivery of the MOD 2 SPALT proofing kit with kit reserve assets for the UK CR, and preparation of initial inputs for the MK 1 MOD 2 fleet documentation. FY01 UK Production effort requires the procurement of material, the build, sell-off and installation of all SWSMIN MK 1 MOD 0 SPALT kits for UK SSBN and training deliverables along with supply system spares. This effort also requires the procurements of advance material for the SWSMIN MK 1 MOD 2 SPALT kits.
