It all starts with high performance relationships.

Strategy and Procurement Manager - High Performance Computing

£40-50,000 Nr Reading, Berkshire

Tasked with maintaining the UK's nuclear deterrent, the Atomic Weapons Establishment is renowned as a global centre of scientific and engineering excellence. Our Aldermaston site, near Reading, was home to the nation's first Supercomputer. And next year, with the help of significant government investment arising from our compliance with the Comprehensive Test Ban Treaty, we'll be taking delivery of what is expected to be Europe's most powerful HPC. To meet the business needs of today whilst staying at the forefront of technology, we now operate as a privately-owned organisation,

**AWE Plc.**

This latest purchase is just part of an ongoing commitment to stay leading-edge, and in what is a high-profile and influential role, you'll be responsible for determining our HPC procurement plans and strategy. As you can probably imagine, this will involve nurturing relationships with HPC vendors across the globe, as well as the AWE scientists, engineers and procurement staff who constitute your client base. It could be that you have experience in a similar HPC environment, or that you're looking to make the move from an HPC vendor. Either way, you'll need an in-depth technical knowledge of HPC products themselves and a commercial understanding of the wider HPC marketplace.

As well as the opportunity to continually develop your abilities within a challenging area, you'll enjoy a good benefits package that includes 28 days' holiday in addition to statutory bank holidays and a generous final salary pension scheme.

To find out more about this role and apply online visit [www.awe.co.uk](http://www.awe.co.uk). Alternatively, you can call us on 0118 982 9009 for an application form.

AWE welcomes applications from women and men, regardless of disability, sexuality, racial or ethnic origin, age (up to 65) or responsibility for dependants. Successful candidates will be selected solely on their ability to carry out the duties of the post.

Because of the nature of the work undertaken at AWE, this post is required to meet special nationality rules and therefore is only open to British Citizens. All selected candidates will be required to undergo security clearance.
