Job Location(s)

UNITED KINGDOM

About the Job

The incumbent performs coordination and liaison with both the US and UK submarine design communities to ensure effective conduct of the UK Successor Program. Reviews management arrangements to ensure the PSA and Technical Arrangement requirements are satisfied. Advises OIC SPUK and SPHQ personnel of all issues and concerns that arise within the VANGUARD Successor Program as well as the TRIDENT II in-service program in the areas of flight and shipboard systems. The engineer will be responsible for reviewing all management arrangements associated with the Successor Program and ensuring design work is conducted in accordance with the Polaris Sales Agreement. Remains abreast of engineering changes to the SWS system and any delays associated with the SSP SSI Program that threaten the Successor Program schedule. Interacts frequently with the Future Submarine (FSM) IPT representatives to stay abreast of all developments with the UK Successor Program. Evaluates program milestones against US project milestones and identify and work with US and UK government personnel to resolve discrepancies and issues. Interacts frequently with Strategic Weapons Systems (SWS) IPT representatives to stay abreast of all technical and programmatic issues.

associated with SWS shipboard systems (Fire Control and Navigation subsystems). Maintains liaison with the SSP Technical Branches and US contractors. Represents SSP at meetings and conferences at national/international levels as an authoritative source on the interfaces between the US and UK strategic weapons systems. Communicates frequently with SSP Senior Representatives, Coulport and DML to resolve all issues which arise during VANGUARD class overhaul and in-service support operations.

Hiring Organization

The Strategic Systems Programs Liaison Office (SPUK) represents the US Strategic Weapon System (SWS) community to the United Kingdom.
