IDENTIFICATION MARKING ON CASES AND DOCUMENTS

Shipping containers will be marked in accordance with MIL-STD-129 (latest revision) as modified by the following:

- All shipping containers will carry the MILSTAMP address label DD1387, which indicates the Consignee Consignor, Project Code Number and Transportation Control Number, National Stock Number, or Drawing Number, and Quantity contained therein.
- The project code number "Z.K." and a Transportation Control Number (TCNs) shall be placed on address labels, GBLs or TCMDs.
- A triangle, outlined in blue, must be affixed to the outside of the shipping container and on all associated shipping documents. The size of the triangle on the container should be commensurate with the size of the container. It will not be smaller than two inches from base to apex or larger than twelve inches. Within the triangle,

midway between the base and the apex, a horizontal line will connect the two sides of the triangle. Above the line, the letters "A.B." will appear, below the line, the letters "Z.K." will appear. A stamp may be used for placing this symbol on shipping and invoicing documents.

NOTE FOR ADMINISTRATIVE CONTRACTING OFFICER: Assure that shipping containers are marked in compliance with above procedures and provide all MILSTAMP documentation such as Military Shipment Label, DD Form 1387, and Government Bill of Lading, Form SF1103 or Transportation Control and Movement Document, DD Form 1384. For detailed instruction, refer to U.S. U.K. Movement Plan. Eight copies of DD250, "Material Inspection and Receiving Report" shall be forwarded to Strategic Weapons Facility Atlantic (SWFA), Code 50311.UK, Bldg. 6003, 1150 USS Los Angeles Road, Kings Bay, Ga 31537-2634, ATTN: Ten Benneet.
