

1 The children went for a swimming

2 T VAN - 126 workdays

VAN + VICT → 180 workdays → 90 ea

240
- 180

60

Since VICT is 90 → 60 workdays

→ Min 3 cons before Oct.

50 per year →

73
365

5

∴ expected gap between cons 73 days

89 | 90 | 91 | 92 | 93 | 94 | 95 | 96 | 97

Effect of delay in A90

- ① 18 month delay in reaching required stockpile level
- ② Actual stockpile 75 workdays less than planned at set date
- ③ When VICT operational produces 65 workdays behind target - (170 not 230)

Chapel / vessel + 3rd tier

Rele 19-181

P 27-

Reel incorporates design features

what about well beyond our permits

Bevi Roberts → circuitry as

reads on 8 CCN

12th physically smallest bearing

design we have so far advantages

P 28 20/11/78 Tex

- handles hgt speed RB = of Reel

- not too fast → same speed

P 29 - (Chapel) Same design principles

(Fundata) + physically small

P 30 ~~22/7/78~~ 27/7/78

- Gavel public information plan

- of Fundata,

P 31 - Gavel wiring may be partially

Bevi's point on it
