"Opal: A system for computing noncommutative Gröbner Bases", Edward L. Green, Lenwood S. Heath, and Benjamin J. Keller, RTA-97, H. Comon (ed.), LNCS # 1232, Springer-Verlag, 1997.

"Abstraction Refinement Model: Perspectives on systems reengineering", Benjamin J. Keller and Richard E. Nance, in *Proceedings of the 3rd Annual Systems Reengineering Technology Workshop*, Naval Surface Warfare Center, White Oak Detachment, 1992, 69–76.

AWARDS:

Provost's Research Award for New Faculty, Eastern Michigan University, 2003.

FUNDING:

FUNDED

SLBM Transition to a Multi-Paradigm Software Suport Environment, James D. Arthur, Richard E. Nance and Benjamin J. Keller, Funding for one year project from Naval Surface Warfare Center, Dahlgren Division, January 2002 – September 2002.

Transitioning the SLBM Software Process to Object-Oriented Development via Training, Benjamin J. Keller, Richard E. Nance and James D. Arthur, Funding for two-year project from Naval Surface Warfare Center, Dahlgren Division, May 2001 – August 2002.

A System for Computing Noncommutative Gröbner Bases, Benjamin J. Keller, Funding for one year through Montana NSF EPSCoR (MONTS), May 1998 – May 1999.

Big Sky Conference on Discrete Mathematics, Jennifer McNulty, P. Mark Kayll, Benjamin J. Keller, Erin R. Spicer, and Evan B. Wantland, Funding for three years through NSF program on Algebra and Number Theory, 1998-2000.

IN PREPARATION

Jumping Connections: A Unifying Approach to Recommender Systems, Naren Ramakrishnan, Benjamin J. Keller, Sriram Pemmaraju, Lenwood S. Heath, Joseph Konstan, John Riedl. Proposal for three year project funding through NSF program on Information and Data Management. In revision to submitted, March 2003.
