The main item for discussion at the 24 October NFLA(S) in Kirkcaldy will be nuclear emergency planning. The issue is on the agenda because of the big nuclear sub 'Short Sermon' exercise at Faslane between 17-19 November. 'Subs' are not 'sites' but could you join the NFLA(S) to talk about some of the generic problems of nuclear emergency planning as reviewed by you last year and now followed up in current continuing correspondence?

You may recall I presented a paper at Faslane on subs emergency planning back in February 1994. I've read the paper again and read the current edition of Clydepubsafe supplied by SCND. I can't see anything substantive has changed so I've given my paper to NFLA(S) for inclusion on their agenda as background information. I'll copy it to you for your info. I did send it to [Redacted] for comment in case there had been developments which I had missed but he has not yet responded.

Please let me know if you can do a little presentation to NFLA(S) (about 15 minutes) at their 24 October meeting in Kirkcaldy (9.45-11.00am).

Thanks
