

Draft contents page for report from ICAN UK for the HC2013 Conference in Oslo (March))

The humanitarian impact of the detonation of a 100 kiloton nuclear warhead in the United Kingdom

Executive Summary

Introduction

1. Accidental detonation involving a nuclear weapons facility

Effect on 3 scenarios: Aldermaston – Faslane - in transit

For each scenario:

- immediate impact (death and destruction)
- longer term impact (climate, food production)
- emergency response (or lack of it)

2. Nuclear weapon attack on UK city: Manchester

Same criteria to be used:

- immediate impact
- longer term impact
- emergency response

3. - Impact and consequences – including environmental ‘blowback’ on the UK of a nuclear attack on a foreign country (baseline Russia) using the nuclear weapons carried by one Trident submarine

Same criteria if feasible:

- immediate impact
- longer term impact
- emergency response

Conclusion
