Unavailable = "In use by govt dept"

All have been requested for return to TNA.

Expect substantial redactions.

When returned, BB will be notified and they will be photographed asap.

DEFE 24/2120 & 2121 appear to be concerned only with theatre weapons, both nuclear and non-nuclear as alternative delivery systems to aircraft. These files not photographed because they are not concerned with strategic systems. Can be done later if thought useful.
