Nuclear leak fores submarine's return.
=====

A radioactive leak has forced the Royal Navy submarine HMS
Sceptre to return to port.

The 4500-ton boat, built in 1978, was on patrol off Britain
when leaks in its reactor's cooling systems were detected and
-- Hit <RETURN> for more (67% read) --
Conf (? for help):

The MoD said there was no risk to the crew or public. But defence sources said there was concern among the crew.
