**SOUTHAMPTON NUCLEAR SUBMARINE Z BERTH**

Reference:

A. Southampton City Council Fax dated 26 May 99

The purpose of Z berths is to provide submarine crewmembers with an opportunity to make occasional operational or recreational visits to port. Where circumstances permit, they can also be utilised to give the general public the opportunity to look round a nuclear powered submarine.

It is not and never has been MOD policy to use Z berths to carry out maintenance or repair of the submarine reactor or to provide a safe haven for a damaged nuclear powered warship. Entry with a leaking or damaged reactor would most certainly not be permitted.
