

FASLANE - SCOTLAND'S CHERNOBYL

The largest ever nuclear accident exercise will

take place at the Faslane submarine base on the Clyde on 17th - 19th November.

During Exercise Short Sermon the reactor on a submarine will be facing a meltdown which could put millions of people in Scotland at risk

In the event of a major accident people living 100 kms from Faslane should be told to take shelter according to the Navy's own manuals. Food would be contaminated over an even larger area of Scotland.
