Subject: Sub Ops

Thank you for the info concerning possible U.S. sub services to cover British Trident subs. I regret that info concerning the subject is not available. The general spirit of the the U.S. leadership is that the Cold War is still on. A primary mission of U.S. subs today is ISR (Intelligence, Surveillance and Reconnaissance) and for that reason nothing is disclosed about deployment schedules, locations or activities. Any R.N. request for support would be coordinated through the Sub Op Center in Norfolk, Va. and never, never disclosed publicly. Sorry but your interest is in one of the most sensitive areas of U.S. military operations and we have no way to crack the secrecy blanket.

Sincerely, Eugene Casrroll
