Subject: Sub up-date from the Co-op!

Dear John & Phill,
Just bumped into a friend in the co-op and was told:-

Foreign subs wouldn't be allowed to take over Hunter killer patrols.
Vanguard is still loaded. It has a few 'rockets' missing. They only have 96 warheads at the moment (I think this might mean between the three operational Tridents)

The Vanguard class have different reactors from the other boats - low maintenance, low risk of going wrong.
Vanguard is out at the moment.

Don't know how accurate any of this is.

love Jane

(via all - for stars)

96 albyell.
