

I am very concerned about the possibility of peace in our world today. I am 12 years old and I am very much interested in politics and I have decided for myself that the best way of nuclear war is not the best way to keep peace between nations. After considering what is happening in some parts of the world, Libya, Nicaragua, Afghanistan and Lebanon the caption for my poster came to my mind. With the recent nuclear disaster at Chernobyl I realized even more what a colossal nuclear attack would mean to all life on earth. I would be very grateful if you were to publish my poster so that everyone can think about my question. Yours faithfully ANWYN BEIER.

WHAT MAKES MANKIND, MANKIND?
